

Cisco SecureX and Farsight Security

Farsight Security DNSDB® joins the Cisco SecureX threat intelligence ecosystem, to empower SOC analysts to respond to the latest threats.

Technology Overviews

Cisco SecureX

Accelerate threat hunting and incident response by seamlessly integrating SecureX threat response and your existing security technologies. You have the flexibility to bring your tools together, whether it's with integrations that are built-in, pre-packaged, or custom. If you have Cisco Stealthwatch, Firepower, AMP for Endpoints, Umbrella, Email Security, Web Security, or Threat Grid; SecureX threat response is included with your license at no additional cost.

- ✓ Connect your entire security stack—Cisco or otherwise—for faster investigations
- ✓ Aggregate and correlate security context from multiple technologies in one view
- ✓ Get the most out of your existing security investments, including from our technology partners

Farsight Security's Solution

Farsight Security DNSDB® is the world's largest DNS intelligence database that provides a unique, fact-based, multifaceted view of the configuration of the global Internet infrastructure. DNSDB leverages the richness of Farsight's Security Information Exchange (SIE) data-sharing platform and is engineered and operated by leading DNS experts. Farsight collects Passive DNS data from its global sensor array. It then filters and verifies the DNS transactions before inserting them into the DNSDB, along with ICANN sponsored zone file access download data. The end-result is the highest-quality and most comprehensive DNS intelligence service of its kind — with more than 100 billion domain resolution records and updated in real-time at over 200,000 times/second.

Integration Highlights

The Farsight Security and SecureX threat response integration enables a user to initiate an investigation for verdicts on IPs and Domains.

The Farsight Security DNSDB provides real-time enrichment data about IP Addresses (IP and IPv6) and Domains.

To install the Farsight DNSDB Relay, visit <https://github.com/CiscoSecurity/tr-05-serverless-farsight-dnsdb>

Integration Use Cases

- ✓ Unifying visibility across all parts of the customers' security portfolio: Farsight Security, Cisco or third-party solutions
- ✓ Providing customers and partners business value in under 15 minutes, through a fully cloud-native solution
- ✓ Analyzing events and data across the enterprise
- ✓ Identifying within minutes who and what has been targeted, enabling remediation using data enrichment across security products and threat intelligence feeds
- ✓ Bringing the power of Farsight Security and Cisco Talos threat analysts into the customer's SOC to hunt for the latest threats

About Cisco Systems, Inc.

Cisco (NASDAQ: CSCO) is the worldwide technology leader that has been making the Internet work since 1984.

Our people, products, and partners help society securely connect and seize tomorrow's digital opportunity today.
