

King & Union and Farsight Security

Farsight Security DNS intelligence offers a unique point of view for threat investigations

**KING & UNION**

King & Union and Farsight Security deliver a seamless integration experience focused on collaboration, automation, and visualization.

Technology Overviews

Avalon Threat Platform

Avalon aggregates threat data into a single workspace, allowing analysts to visualize threats, collaborate in real-time, and more easily manage threat data. Barriers to information sharing are broken down by allowing users to securely create trusted groups within their organization and with partners across the industry to collaboratively investigate threats in real time using Avalon's interactive, visual workspace. Investigations are conducted more efficiently by pulling data into a central workspace and allowing for enrichment with user data, unique Avalon data, and exclusive third-party data sources. Users can also create robust, yet easy to understand, visual reports of any investigation and never again have to worry about losing investigative intelligence when teams change personnel or a file is deleted, overwritten, or lost. The result is reducing investigation times from hours to minutes.

Farsight Security

Farsight Security DNSDB™ is the world's largest DNS intelligence database that provides a unique, fact-based, multifaceted view of the configuration of the global Internet infrastructure. DNSDB leverages the richness of Farsight's Security Information Exchange (SIE) data-sharing platform and is engineered and operated by leading DNS experts. Farsight collects Passive DNS data from its global sensor array. It then filters and verifies the DNS transactions before inserting them into the DNSDB, along with ICANN-sponsored zone file access download data. The end result is the highest-quality and most comprehensive DNS intelligence service of its kind — with more than 100 billion domain resolution records and updated in real-time at over 200,000 times/second.

Integration Highlights

Passive DNS intelligence data (forward and reverse) to identify infrastructure relationships

Real-time collaboration for modern investigations

Visual / graphical representation of data to easily decipher data relationships

Efficiencies through automation allowing focus on data analysis—not data research

Automated workflows and data import / export capabilities

Custom dynamic graphing and threat visualization

Integration Use Cases

- ✓ Domain or IP enrichment
- ✓ Indicator of Compromise (IOC) correlation
- ✓ Historical resolution lookups
- ✓ Time-based analysis

CHAT

aaron 3:22 PM
Looking in to [buyheroin.com](#).
For hopefully obvious reasons.

aaron 3:22 PM
Also going to check farsight data on that domain.

aaron 3:22 PM
I'll color the Farsight results blue

mwager 3:28 PM
copy

mwager 3:29 PM
I'll dig into Farsight data

aaron 3:31 PM
k. That
[103.224.182.253](#) IP looks to be an interesting connection, though it might be a hosting IP or something. Have to dig on it a bit more.

About King & Union

King & Union is outsmarting cyber adversaries by uniting security professionals and amplifying the power of the cybersecurity analyst. The company's flagship product, Avalon, is a threat analytics platform built with collaboration at its core. Avalon provides a dynamic workspace where security operators and analysts can lean in, cut through the noise, and reduce the time to address threats from hours to minutes. The platform provides access to truly unique and exclusive data sources, automating repetitive workflows, and leveraging real-time collaboration to deliver unparalleled insight and full context based on facts.

Learn more about how we can optimize your threat investigations with the Avalon platform at <https://www.kingandunion.com>

About Farsight Security

Farsight Security is the world's largest provider of historical and real-time passive DNS data. We enable security teams to qualify, enrich and correlate all sources of threat data and ultimately save time when it is most critical - during an attack or investigation. Our solutions provide enterprise, government and security industry personnel and platforms with unmatched global visibility, context and response. Farsight Security is headquartered in San Mateo, California, USA.
